

Final distribution of ISO/IEC 19770-2 has ended

The distribution of ISO/IEC 19770-2 has been completed and a few final edits are being completed. The standard will be submitted as a final committee draft by early October 2008 at the latest. More information on the various activities going on around this standard as well as details of the expected progress of the standard will be presented at the same time as the standard is submitted as a final committee draft.

T

The latest distributed copy of the draft ISO/IEC 19770-2 standard, "Information technology - Software asset management - Part 2: Software identification tag" went through its final review and is being finalized for submission as a final committee draft. The scheduled timeframe for the distribution period is now over and draft copies are no longer available for download. As a final committee draft (FCD) the draft standard will go through a voting process that is managed by national bodies involved in the ISO/IEC standards development process.

More details about the expected progress of this standard between now and the time that it becomes an International Standard (IS) will be posted as the draft is submitted as an FCD. Please see the forums on this site for additional information regarding the standard. Additional details regarding the development of this standard follow:

Development team

The OWG is made up of SAM practitioners, SAM consultants, SAM tool providers, SAM service providers and software manufacturers. Even with such a diverse group and the wide variety of differing requirements, we were able to come together as a community and find a way to create a standard that meets everyone's needs — this speaks volumes to the efforts of the team! Without the individual commitment and hard work of these volunteers, this standard would not have progressed as quickly as it has. The following individuals have been working tirelessly on the standard (sub-committee leads are highlighted in bold):

Name
Title

Organization(s)

Adam Ayer

President

LicenseLogic

Alison Holt

Director and Co-Founder

Concrete Campus

Andew Lever

Bill Goss

President

Quality Systems Consulting

ManageSoft Corporation

Tony Crawley

SAM Consultant

AstraZene

The last editorial updates of the standard were done with significant help from Krzysztof ("Chris") Baczkiewicz and Marcin Jaworski from Eracent as well as David Bicket, convener of WG21.

The entire team has put a significant effort into the development of this standard. I'm delighted to have been involved the development of this standard and in working with a team that has been able to look past individual differences and create a specification of enduring value.

Please contact Steve Klos at +1 408.871.0482 or e-mail to steve.klos@agnitioadvisors.com with any questions or issues.

If you are interested in being added to a distribution list to receive updates regarding this standard, please send an e-mail with your contact details to opt-in@agnitioadvisors.com.
